This issue hits newstands September 20th..... Peep an excerpt from the upcoming issue.

XXL's new executive editor, Jayson Rodriguez, moderated a roundtable discussion between MMG stars Wale, Meek and Pill, to find out about each rappers role in the crew, what MMG represents as a team and what gives them an advantage over their competitors.

“I think it’s a plus that everybody got their own fan base, they got their own thing rocking in their own city, and they got their own representation of what they stand for,” Pill says. “So when everyone comes together, that’s all the fan bases combined. It’s a blessing to be able to rock with a bunch of different guys that are passionate about the craft and that know where they going and actually can foresee the future, when it comes to their music. I think that gives us a stronghold and a bit of longevity. And kind of an advantage also. ”
